

Global Iris - Servicing Your Invisible Customers

Making Your Website Pay

Whether you're new to taking on-line payments or an experienced e-trader looking to move up a gear, Global Iris is the simple, professional way of streamlining your e-Commerce presence.

Easy Telephone Payment

Taking payments with the customer not present has never been easier – or more secure. Even when you have a great e-Commerce website, some customers still prefer the assurance of contact with a human being. Global Iris not only provides you with all you need to take telephone payments, but we make it easy for you to integrate them with your other payment methods.

The Right Solution

Global Iris is an online payment gateway with a powerful suite of options that can be integrated seamlessly into your business. You simply need to choose how best to build Global Iris into your organisation. Here are some of the options:

Virtual Terminal

This is a simple solution that's ideal for accepting telephone or similar Customer-Not-Present (CNP) payments. It's equally at home in a small trader environment or in a large call centre.

Re-Direct

The quickest and simplest form of website integration, the re-direct option lets you take orders on your website and then pass the details invisibly to our secure payment gateway. Your customer will see a payment screen with your branding alongside ours, reassuring them that their details are safe.

When the payment's complete, the buyer is re-directed back to the correct response page on your website for you to complete the order.

Remote

Suitable for enterprise-level e-Commerce websites, this option allows you to host the entire payment process within your site. We provide you or your developers with an Advanced Programming Interface (API) that simplifies the development of your own bespoke payment structure.

Whatever your requirement, Global Iris has the power, the flexibility and the security to make it possible.

*Lines are open Monday to Friday, 9am - 6pm, excluding public holidays. Calls may be recorded. We also provide a Textphone service on 0845 602 4818.

Global Iris - Servicing Your Invisible Customers

The Simple Solution

A powerful, flexible e-payment system is all very well, but not much use to you if it's a nightmare to integrate with your website. We've listened to web developers and paid attention to the problems and frustrations they've encountered in implementing other online payment gateways. So we're confident that with the support we can provide to you and your web developer, your Global Iris connection will be easy and trouble-free.

The Secure Solution

We're constantly refining and improving our systems to make sure that we stay well ahead of the curve to beat the fraudsters. Much of what we do in this area serves to make compliance easier to achieve with security requirements. It's part of the way we help you concentrate on your business.

3D Secure

The principal card issuers have developed sophisticated systems to combat fraud. Visa's *Verified by Visa* and MasterCard's *SecureCode* are both fully supported and seamlessly integrated within Global Iris.

There's also a full suite of security checks and controls going on in the background throughout every transaction. Purchases are subject to fraud scoring, transaction screening, card security code checking and address verification, all without interrupting or delaying a fast, user-friendly payment service.

The Global Solution

The Internet is a global medium. If you want to extend your websites' reach beyond the UK, Global Iris can support full multiple currency processing. The opportunities are there for the taking, so why not let us help you bring them within your reach. You can find additional information about Global Iris on our Resource Centre at the following address. <https://resourcecentre.globaliris.com>.

*Lines are open Monday to Friday, 9am - 6pm, excluding public holidays. Calls may be recorded. We also provide a Textphone service on 0845 602 4818.
