

Technology Turned Friendly

Mosaic gives you the data you need to run an efficient operation, anytime, anywhere. Say hello to technology that you'll love to use!

Powerful Software

Heartland Mosaic is an integrated, web-based foodservice management solution that supports the key functions you need for your program's success.

Available in the Cloud

Access your program data from nearly any internet-connected device. With Mosaic Cloud, we manage all software upgrades and server maintenance.

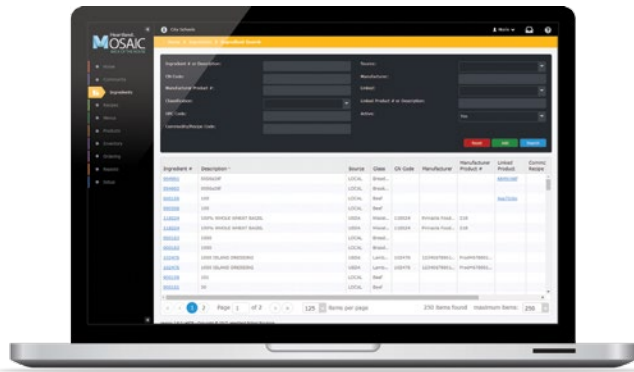

Intuitive, Modern Design

Mosaic was designed with you in mind. The simple and elegant graphical user interface allows for optimal speed and ease of use.

Flexible Reporting

Use the customizable reporting engine for accurate and reliable data and financial management to enable smart, data-driven decision making.

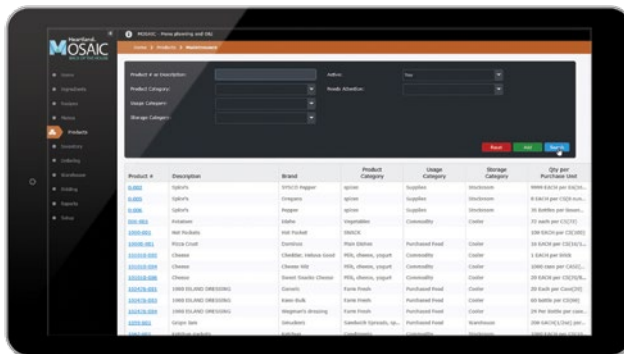

Menu Planning with Production

Mosaic Menu Planning with Production is designed to help you work smarter. With powerful reporting tools and smartly designed screens, you'll experience new levels of program efficiency.

Point of Sale

Mosaic POS is loaded with features to help you stay connected and productive while keeping your serving lines moving. Create enhanced menus with tailored images, colors, and layouts.

Ordering & Inventory

Mosaic Ordering & Inventory gives you the data to maintain tight controls and manage food costs. Prevent overstocking and shortages - order exactly what you need, when you need it.
